

Program E: Auxiliary Account

Account Authorization: R.S.: 36:354

It is the goal of this program to promote energy efficient new housing and cost effective energy efficient retrofits in existing housing. The mission of the program is to provide home energy standards, ratings and certification programs that enable the private sector to have a method to measure energy efficiency in new houses and energy efficiency improvements in existing housing. These efforts assist private sector lenders to implement Energy Efficiency Mortgages and home energy improvement loans.

OBJECTIVES AND PERFORMANCE INDICATORS

Unless otherwise indicated, all objectives are to be accomplished during or by the end of FY 2001-2002. Performance indicators are made up of two parts: name and value. The indicator name describes what is being measured. The indicator value is the numeric value or level achieved within a given measurement period. For budgeting purposes, performance indicator values are shown for the prior fiscal year, the current fiscal year, and alternative funding scenarios (continuation budget level and Executive Budget recommendation level) for the ensuing fiscal year (the fiscal year of the budget document).
